This step and beautiful crag is suited in the North of Sweden. During summer, in June and July, it is possible to climb during the night because of the midnight sun.

Drive from the town Luleå on highroad E4 in the direction of Haparanda, after about 40 km, turn left in the direction of Böle and Niemisel. After about 30 km you arrive to Niemisel, a small village. Continue through the village and after about 4-5 km you have the MTV Wall on your right. A small road turns sharp into the wood to the right, park there. Follow the road for about 50 metres and then turn of to the left on a track that leads to the crag. The crag is 30 meter and many hard routes has made this crag very popular among the top climbers in Sweden.
