How to find the crag:

About 10 kilometers from Åre on the road E14 between Åre and Östersund, turn in the direction of Undersåker. Drive trough the village down to the road signposted for Vålådalen. Turn and pass the railway trail. After 2 kilometers you will find a big car park on your right. Follow the dirt road, marked with red cross and signposted "Trillevallen" and "Välliste". After about 500 meters the dirt-road will become a track and shortly after a dirt-road again, followed by a T-junction. Turn right, continue for about 300 meters and the turn right onto a track that leads to the crag. Many of the routes needs gear or could be climbed with a top-rope.
